Apex Increases Folding/Gluing Capabilities

Addition of Two Brausse Folder Gluers Enhances Apex Speed

San Carlos, CA – Apex Die Corporation, a leading finisher in Northern California, proudly announces an increase in production abilities and enhanced out-put capability with the addition of Brausse folder gluers.

Apex Die adds the two machines to its already impressive line-up of folder/gluers to bring the total machine count up to five high-speed folder gluers in the San Carlos facility. "The addition of these two machines gives us greater capability to run large projects as well as offering more versatility in packaging production," says Apex Die President, Kevin Cullen.

"The process of folding and gluing is essential to most projects we work on and the addition of these two state of the art machines ensures that production schedules can be met in a timely fashion," says Cullen.
